Niostem

Beauty technology

€1M

Revenue in the first 30 days

Launched a high-value beauty technology product, generating €100K within the first 60 minutes of launch day and €1M in its first 30 days.

11.2×	€133	€1,500
ROAS	Customer acquisition cost	AOV and CLV

€100K in the first 60 minutes on launch day.

ROAS is reported separately; its exact measurement window is not specified in the source.

Shackleton

Luxury outdoor

+219%

Meta revenue, Q4 2025 vs Q4 2024

Scaled paid acquisition for a luxury outdoor brand, improving channel revenue and Google acquisition efficiency in the same year-over-year quarter comparison.

+144%	5.40×	-52%
Google revenue	Google ROAS	Google CAC

Performance across Meta and Google, with premium positioning at the center of the offer.

Comparison: Q4 2025 vs Q4 2024. Channel revenue is not total company revenue.

Mammaly

Pet wellness

€40M

Revenue over four years

Built the ecommerce growth engine from launch, reaching €300K in monthly sales within two months and supporting a four-year scale-up.

€13	€45	€500
Customer acquisition cost	Average order value	Customer lifetime value

From zero to €300K monthly sales in two months.

€40M is a four-year revenue total; €300K is a monthly sales level.

Offset Nutrition

Nutrition

€15M

Annual revenue

Scaled an ecommerce nutrition business from approximately €100K in monthly revenue, connecting paid acquisition with conversion and customer value.

€14	€77	€400
Customer acquisition cost	Average order value	Customer lifetime value

Starting point: approximately €100K monthly revenue.

The starting figure is monthly; the result is annual. Time to reach this scale is not specified in the source.

GamersOnly

Gaming commerce

€6M

Annual revenue

Developed online revenue from a zero baseline into an ecommerce business with €6M in annual revenue, supported by acquisition and repeat customer value.

€18	€63	€360
Customer acquisition cost	Average order value	Customer lifetime value

Online revenue built from zero.

The source does not specify the elapsed time to reach €6M annual revenue.

Creativeaty

Ecommerce turnaround

+295%

Revenue growth

Moved acquisition from negative contribution to profitability while improving conversion and order volume.

€480K	4%	9K
Revenue	Conversion rate	Orders

A turnaround across acquisition, conversion and order volume.

The comparison period is not specified. Profitability refers to acquisition contribution, not a whole-company profit claim.

A selection of growth results.

binect

B2B · AI go-to-market

€880K

Reported 90-day outcome

Built an AI-driven lead engine connecting data enrichment, personalized outreach, sales funnels and video sales letters.

90 days	€80K	€250K+
Outcome window	Average order value	Customer lifetime value

An AI-enabled B2B acquisition engagement, distinct from the ecommerce portfolio.

The source calls €880K a 90-day outcome; it does not specify recognized revenue, collected cash or pipeline.

AKNEDERM

DTC skincare

€10M+

Additional online revenue per year

Expanded an established pharmacy skincare brand into a scaled direct-to-consumer business, connecting acquisition, creative and the online buying experience.

< €8	€50	€97
CAC in selected periods	Average order value	Customer lifetime value

A standout European TikTok growth engagement. TikTok China HQ contacted the team.

The sub-€8 CAC applies to selected periods; the revenue figure is annual.

Agentic AI. Commercial intent.

VYBE Beauty

AI commerce · Beauty technology

€500K+

Sales in the first 12 months

Built an AI-led beauty technology business from zero, reaching more than €500K in sales during its first full year.

€28	€80	€200
Customer acquisition cost	Average order value	Customer lifetime value

AI-led commerce from launch through the first full year.

The case establishes an AI-led operating model, not an isolated measure of AI's incremental impact.

Experience informs the system.

Historical portfolio results establish growth experience. Today, AI accelerates preparation, analysis and execution inside a defined commercial workflow.

Connect — Approved advertising, commerce and customer data.

Prepare — Research, creative hypotheses and the next test.

Review — People own strategy, brand standards and budget decisions.

Ecom success. The whole equation.

Ecom Success =

(Traffic × Conversion Rate × Average Order Value
+ CLV - CAC - Cost of Goods Sold
- Picking - Packing - Shipping) **Differentiation**

A strategic framework, not an accounting equation. Financial analysis uses consistent periods and units and avoids counting first-order value twice within CLV.

The operating rhythm.

Diagnosis Find the constraint in acquisition, conversion and customer economics.

Prescription Define the priority, work required and success measures.

Synthesis Connect the team, paid acquisition and AI. Execute, learn and refine.

Let’s discuss your next growth opportunity.
